NGUYEN THI ANH NGAN

Data Analyst Intern

0372421712 nguyenanhngan0803@gmail.com Ho Chi Minh City, Viet Nam

SUMMARY

Data Analyst Intern with a Management Information Systems background and hands-on academic project experience in SQL, Python, Power BI, Excel, statistics, and machine learning. Experienced in data cleaning, EDA, regression, classification, clustering, dashboarding, and decision-support projects. Interested in applying data analytics to FinTech, digital banking, customer behavior, risk, and product performance.

SKILLS

Data Analysis	Data Cleaning, EDA, Data Preprocessing, Feature Engineering, Business Insight Reporting
Python	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
SQL & Database	JOIN, GROUP BY, Aggregation, Subquery, CTE, Window Functions; SQL Server
Statistics & Machine Learning	Regression, Classification, Clustering, Basic Statistics, Model Evaluation
BI & Visualization	Power BI, Excel Pivot Table, Dashboard Design, KPI Visualization
Tools & Workflow	Jupyter Notebook, Google Colab, Git/GitHub basic
Soft Skills	Analytical Thinking, Critical Thinking, Detail-oriented, Clear Communication, Team Collaboration

PROJECTS

Retail Marketing Analytics & Customer Segmentation 02/2026 - 04/2026

Data Analyst

- Analyzed customer and transaction data using Python to identify behavior patterns, campaign response drivers, and high-value customer segments.
- Performed data cleaning, feature engineering, and EDA to prepare reliable inputs for analytical modeling.
- Built clustering, regression, classification, and association rule models for segmentation, prediction, and cross-selling analysis.
- Predicted campaign response and identified priority customer groups to support targeted marketing decisions.
- Translated analytical insights into actionable recommendations for customer targeting and campaign optimization.

Human Resources & Payroll Database Management System – CellphoneS 10/2025 - 11/2025

Data Analyst

- Designed a SQL Server database to centralize HR, attendance, payroll, and performance data.
- Built ERD, relational schema, constraints, indexes, views, stored procedures, functions, triggers, and transactions to ensure data integrity and query efficiency.
- Used SQL queries including joins, aggregations, CTEs, and window functions to generate payroll, attendance, and workforce reports.
- Automated payroll calculation, contract checking, attendance validation, employee lookup, and workforce reporting.
- Applied role-based access control to secure sensitive HR and payroll data for different user groups.
- Developed Power BI dashboards and SSRS reports to monitor workforce status, payroll cost, employee performance, and HR risk alerts.

Decision Support System for Real Estate Marketing Strategy 03/2026 - 05/2026

Data Analyst

- Built an Excel-based Decision Support System to optimize marketing budget allocation, discount policy, and service package strategy.
- Applied regression analysis to measure the impact of marketing budget and discount rate on business performance.
- Used Solver, Goal Seek, Scenario Manager, and Pivot Table to simulate business scenarios and decision constraints.
- Created Power BI dashboards to track revenue, ROI, conversion rate, customer satisfaction, and campaign performance.

- Converted business problems into measurable decision models and actionable management insights.

Sales Management System Analysis – GS25 10/2025 - 11/2025

Business Analyst

- Collected and analyzed business requirements related to sales reporting and operational workflows.
- Analyzed AS-IS processes and designed TO-BE workflows to reduce redundant reporting steps.
- Proposed process improvements that reduced manual reporting time by approximately 30%.
- Defined functional requirements and user stories to support system development.
- Applied analytical thinking to identify workflow inefficiencies and recommend data-driven improvements.

EDUCATION

University of Finance – Marketing 2023 - 2027

Bachelor's Degree in Management Information Systems

GPA: 3.55 / 4.0

Data Analyst Course – VTI Academy 08/2025 - 01/2026

Data Analyst

- Data analysis using Excel, SQL, and Python
- Data visualization with Power BI
- Applied data insights into business decision-making

ACHIEVEMENTS

Received 2 Academic Encouragement Scholarships for top-performing students.	10/2025 & 04/2026
Awarded Digiworld Green Talent Scholarship – Software Engineer Training Program.	05/2025
Won "Most Favorite Project" Award at Advanced Information Systems Contest.	11/2025

CERTIFICATIONS

TOEIC 660/990	08/2025
Data Analysis Certificate	01/2026

ADDITIONAL EXPERIENCE

- **Education Consultant – Short-term:** Consulted prospective students to identify learning needs and supported 10+ students in selecting and enrolling in English courses.
- **Event Host / MC:** Hosted events with 200–300 participants, improving public speaking, audience engagement, and communication effectiveness.
